Spray Booth Maintenance & Service

delivering the parts & support you need

www.gallito.co.uk

Service & Support by the people who design and build spray booths

At Gallito Ltd, we know how important productivity is to our customers.

That's why we have established a dedicated Service Operation which is geared to ensuring that your spray booths, ovens and other ancillary equipment operate at optimum efficiency.

Our comprehensive service and maintenance capability includes parts and spares, on-site servicing, breakdown response, legislative compliance testing, and the provision of tailored service packages.

At Gallito Ltd, we have been designing, manufacturing and installing paint finishing systems for a wide range of industrial processes since 1976. Today, we offer advanced, cost-effective solutions and our capability extends from standard spray booths and ovens, through to complete turnkey finishing systems.

Spares & Filters

A large range of spares and filter media are available ex-works for next day delivery.

Our Products & Services

We manufacture an extensive range of standard and bespoke dry-filter and water-wash spray booths, ovens & curing systems, as well as offering complete turnkey systems which can include pre-treatment, portable extraction, turntables and component conveyor systems. Services embrace system design and manufacture, installation and commissioning, operator training, spares and on-going maintenance programmes.

Customer Services

The Gallito service department provides qualified Spray Booth servicing facilities throughout the UK for most paint finishing applications and equipment. Services offered include equipment commissioning and also take in system health checks on existing installations. Periodic maintenance tasks typically include the servicing of burners and fans.

Spare Parts

As a long-standing designer, manufacturer and installer of Spray Booths, Ovens and Paint Kitchens, Gallito is best placed to supply you with replacement parts. Whether your requirement is for booth structural components or light fittings, replacement burner parts or new bearings for axial or centrifugal fans, we are able to supply just what you need.

Filter Media

To ensure clean and efficient operation of your spray booth, it is important to fit quality filter media. At Gallito, we supply a comprehensive range of filter media including Input Filters, Primary and Secondary Extract Filters and all types of Cardboard and Panel Filters. We also supply Cartridges and Filter Bags for a variety of dust extraction plant.

Tailored Service Contracts

Gallito works in partnership with its customers, developing tailored maintenance programmes to meet specific requirements. The benefit for you is an agreed fixed price for regular maintenance, and the knowledge that servicing is carried out by experienced and qualified technicians, at correct intervals, using manufacturers' original parts and consumables.

COSHH – LEV Testing

To assist your compliance with Health & Safety and Environmental legislation, Gallito offer on-site Local Exhaust Ventilation (LEV) testing for spray booths, paint mix rooms, dust and fume extraction systems, and exhaust extraction. It is a requirement that LEV systems are tested at least every 14 months or as specified for the particular process.
